

KaleidaCare Solutions

Facility Management Module

KaleidaCare Solutions offers a Facility Management Module that enables your agency to track open beds, licensed foster homes and residential facility availability to optimize client placements in out-of-home care environments.

The **Facility Management Module** also lets you monitor residential facility licensing, reviews and inspections, including notification of upcoming licensure or recertification events through our unique Tickler Report. This ensures sustainability by providing your decision-makers with a clear and comprehensive view of facility utilization and placement availability.

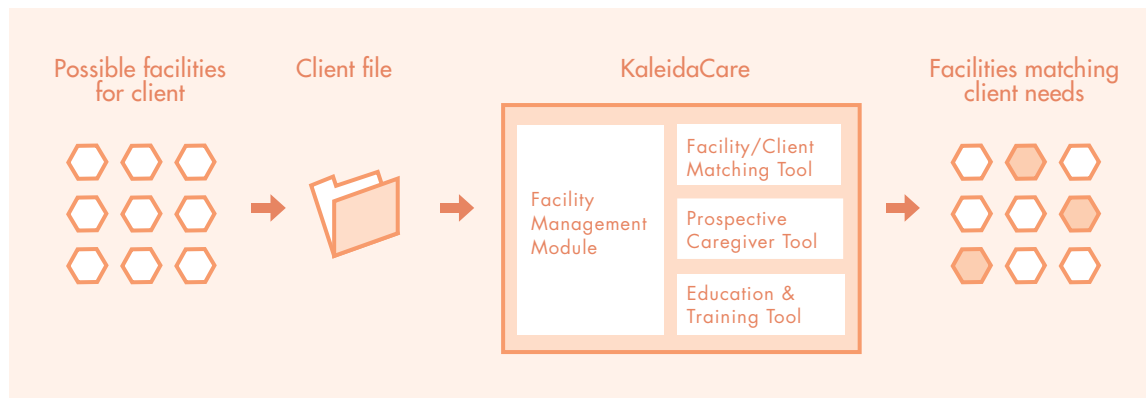

The types of organizations that benefit from the Facility Management Module include:

- Adoption
- Elderly Care/Assisted Living
- Emergency Shelters
- Foster Care
- Group Homes
- Independent or Transitional Living
- Residential Treatment Facilities
- Substance Abuse Treatment Centers
- Summer Camps

Because the Facility Management Module makes it easy to analyze real-time data, rapid decisions for placements can be made. This decreased response time leads to a higher quality of care and an increased probability of a positive outcome for clients, while ensuring appropriate utilization of your agency's resources.

The Facility Management Module comes equipped with three primary tools: the Facility/Client Matching Tool, the Prospective Caregiver Profiling Tool and the Education and Training Tool.

An overview of how the Facility Management Module can help you make better decisions more quickly:

The **Facility/Client Matching Tool** allows users to search for the best available residential facility for client placement based on:

- Gender
- Age
- Level of Care
- IQ Level

In addition, the Facility/Client Matching Tool can send an E-mail notification of the potential client match for follow up or further action. An appropriate residential facility match may also be identified by the following criteria:

- Services Provided
- Programs Provided
- Regions Served

The **Prospective Caregiver Tool** can indicate important residential facility information such as nearby schools, geographic location and preferred client gender and age. This tool tracks foster homes and residential facilities throughout the licensure and approval process by recording:

- Application Date
- Approval Date
- Inspection Date
- Certification Date
- Follow Up Date
- Re-Certification Date
- Application Withdrawal Date
- Closure Date

The **Education and Training Tool** tracks pre-service and continuing education credits for staff, caregivers and clients to ensure compliance with contracts, accreditation and licensure.

Safeguard Licensing and Protect Funding

Your organization can safeguard licensing and protect funding by having aggregate data reports on residential facilities and foster homes to ensure accurate placement information is available when you need it. Accessibility to these reports gives you the opportunity to monitor client placement success and facilitate growth, leading to additional funding and contract opportunities.

The Facility Management Module gives you the information you need, when you need it.
